

MAHIMA SINDAL

Senior Software Engineer

Ahmedabad, India (Open to Relocation: Europe/UK) | +91-9588280989 | mahimasindal@gmail.com [LinkedIn](#) | [GitHub](#) | [Leetcode](#)

Professional Summary

Senior Software Engineer with **5+ years** of experience building **B2B SaaS platforms**, high-throughput **email infrastructure**, and cloud-native **distributed systems** processing **millions of daily events**. Experienced in designing **scalable messaging systems** and **email campaigns**, production reliability, distributed architectures, **observability**, and mentoring engineering teams.

Technical Skills

Languages & Frameworks : JavaScript, TypeScript, Python, Java, Node.js, NestJS, Express, Spring Boot, ReactJS

Databases & Infrastructure : MySQL, MongoDB, Redis, BullMQ, OpenSearch/ ElasticSearch, AWS (EC2, RDS, Aurora),

Docker, CI/CD, Grafana, ClickHouse

AI & Engineering Productivity: OpenAI, Claude, LangChain, LangGraph, MCP, Prompt Engineering, Semantic Search

Concepts & Tools: System Design, Data Structures and Algorithms, Microservice Architecture, **Unit Testing (Jest)** , Jmeter, Postman

Professional Experience

Senior Software Engineer – Backend | Saleshandy

Sept 2022 – Present

- **Messaging Infrastructure** : Owned and evolved distributed backend infrastructure powering **4M+ daily email** deliveries and **2M+ mailbox** interactions, improving throughput while maintaining high availability and achieving **80% unit test coverage**.
([Live at saleshandy.com/outreach](#))
- **Product Engineering**: Contributed to Saleshandy's CRM, Unified Inbox, and multi-channel engagement platform, enabling customer communication workflows across Email, WhatsApp, Calls, LinkedIn (manual & automated), and Task management alongside large-scale email delivery infrastructure. ([Live at saleshandy.com/crm](#))
- **Production Reliability**: Engineered resilient production systems using fallback mechanisms, idempotent execution strategies, observability dashboards, and proactive Grafana alerting, reducing production support incidents by **~90%**. Resolved production issues through **log analysis, monitoring, root cause investigation**, and system improvements.
- **Search Infrastructure**: Engineered **OpenSearch** infrastructure across **400M+ and 80M+ document indexes**, maintaining latency at **100-200ms**. Benchmarked semantic search **performance** with different **embedding models**. ([Live at saleshandy.com/lead-finder](#))
- **Data Ingestion**: Contributed to an S3-backed Kubernetes ingestion pipeline processing **~1.2 TB of data** by implementing OpenSearch Painless transformation scripts.
- **AI Optimization**: Engineered automated reply categorization and AI data preparation pipelines that optimized OpenAI prompt context, reducing LLM token usage and saving approximately \$150/month. ([Live at salesndy.com/unified-inbox](#))
- **Engineering Leadership**: Mentored **8+ engineers** through technical guidance, **design discussions, and code reviews** while developing **AI-assisted hiring workflows** that reduced manual recruitment effort by **5–6 hours per week**. Collaborated **cross-functionally** with founders, product, support, and engineering teams to deliver **platform capabilities**.

Software Developer – FullStack | Accenture

Jan 2021 – Sept 2022

- **API & Backend**: Engineered **RESTful APIs and PL/SQL scripts** reliably aggregating daily telecom data.
- **Python Automation**: Automated complex data migration and validation workflows using Python, eliminating manual overhead and saving **5+ hours/week** in engineering effort.
- **Frontend Monitoring Tooling**: Built real-time network monitoring dashboards **using ReactJS** to visualize critical telecom usage metrics and enhance operational **observability**.

Projects

[BrandVeda–AI Brand Visibility Intelligence Platform](#) | NestJS, MongoDB, OpenAI, Gemini, Perplexity

- Designed data pipelines executing **54 parallel LLM** evaluations across multiple models to quantify brand share-of-voice.

[Resume - Job Matching Assistant](#) | NestJS, TypeScript, LangChain, OpenAI, PDF Parsing

- Engineered an LLM-driven ATS analysis platform to parse PDFs and generate actionable resume skill-gap insights.

Education

2016 – 2020

Jaipur Engineering College and Research Centre (**JECRC**)
Bachelor of Technology (B.Tech.), Computer Science Engineering

Languages: English (Full Professional Proficiency),
Hindi (Native), (willing to learn native language)

Certification: HackerRank Certified Software Engineer / Python
